Subject: Telephone Participation Final Update from E&H

I have now heard from all four Engineers from Verizon with respect to our request to have them participate in maint. trimming. There was one Engr. that agreed to participate in 9 sections as he stated because he has work in the future in that area. All the others refused to participate. I have had 3 of the 4 return the 605A forms stating in some way that they did not want to participate.

Subject: RE: Joint Trimming with Verizon

I just got of the phone with Wes Jones from Verizon. The trimming he had agreed to in his previous letter has been cut from above. Verizon will not be participating in any maintenance trimming for the 2002 year. Wes will be sending a letter out detailing this. I will provide Ray with a copy of this letter for the Veggie Committee.....

Subject: Joint Trimming with Verizon

I received a letter from Wes Jones of Verizon outlining the amount of participation for 2002 in the Concord and Bow area. Wes has agreed to 75/25 trimming on 94 sections which represents 4.5% of the 2050 scheduled sections. Using the projected cost per section of \$163.37 this will amount to approximately a \$3839 contribution from Verizon. I am still waiting for a response from Bruce Gamsby concerning the Penacook area.....
